

A TOTAL SYSTEM FOR YOUR DUST COLLECTOR

Dwyer offers you:

- ▶ Quality products at an economical price.
- ▶ Vendor consolidation to lower your purchasing costs.
- ▶ Product consolidation lowering your total system cost. From timer boards with built-in pressure modules to being able to mount and wire pilot valves and timer board together into one package, ask us how we can help you with your system.

Diaphragm Pulse Valves: For air pulsing filters.

- ▶ Remote or integral coil
- ▶ NPT or Coupling Connection
- ▶ 3/4" to 3"

Pilot Solenoid Valves: For triggering remote coil diaphragm valves.

- ▶ Individual units or prepackaged into enclosures

Digital Timers/Controllers: For controlling pulsing of filters.

- ▶ For on-demand and continuous clean
- ▶ Optional pressure modules to eliminate separate pressure sensor
- ▶ 4 to 255 channel capability

Pressure Gages: For monitoring differential air filter pressure drop and single pressure for compressed air line.

Pressure Switch/Gages: One unit for both monitoring filter pressure drop and initiating on-demand cleaning.

Pressure Switches: For initiating on-demand cleaning.

Pressure Transmitters: For monitoring differential air filter pressure drop and single pressure for compressed air line.

Ball Valves: For shutoff of compressed air line.

Level Controls: For monitoring product build up at the bottom of the collector or receiving vessel.

Bulk Head Connectors: For installation of blow tube through the filter.
